

Initi Cart

The Initi Mobile Computing MedServer ensures highly adaptable medication storage and the latest computer processing available. For streamlined nursing workflow, the Initi features a compact footprint that makes it easy to maneuver at the point-of-care for bedside data and medication management. The motorized height adjustment of the Initi positions the monitor and keyboard at the perfect height for comfortable use. The medication storage area is customized to your choice of patient bins and storage drawers that are available in an array of sizes.
